

The Effective and Efficient Partner for Operational Success

ENSURING THE SUCCESS OF YOUR OPERATION

WE DON'T JUST PROMISE RESULTS – WE DELIVER THEM

At Core Crew, we specialise in improving mining operations through a disciplined approach that combines decades of experience with innovative solutions. Our commitment is to help clients achieve sustained operational improvements that lead to better production and commercial outcomes

HERE'S HOW WE DRIVE SUCCESS FOR OUR CLIENTS

Bringing Global Learnings

Our team has honed its methods and Management Operating Systems (MOS) routines over decades of managing some of the largest and most complex mining operations globally. We bring this depth of knowledge to every project, deploying operational discipline that removes variability and aligns performance with clear goals.

Incremental Improvement for Sustainable Success

We adopt a phased approach to drive operational enhancements, addressing key areas across the asset. This structured method ensures that we not only boost production rates but also create lasting changes that lead to reduced costs and improved site performance.

Providing Expert Leadership and Support

Our leadership team, backed by the Xenco group, leverages deep industry expertise and an extensive network to pull in the best talent and resources for your operation. This partnership ensures you get access to a wealth of industry knowledge and high-level strategic insights, driving consistent improvements across your site.

Building High-Performing Teams

Our SkillStart program rapidly upskills the workforce. Recognizing that the same methods with the same team yield no new results, we focus on developing a capable and adaptable team ready to drive change. Each program is customized to address specific challenges across all operational aspects, ensuring effective solutions tailored to your unique needs.

WHY PARTNER WITH CORE CREW?

Disciplined Operations

Proven processes that deliver consistent, high-quality results.

Transparent Systems

Decades of proven MOS routines that align with mining industry needs.

Rapid Workforce Development

Boosting your workforce capabilities with our SkillStart program.

Leadership Backed by Experts

Supported by the executive power of the Xenco group.

Sustainable Performance

Focused on long-term improvements, not just short-term gains.

CASE STUDY: PROVEN SUCCESS | WHOLE OF SITE | UNDERGROUND MINE

In September 2023, we took over operation control for an underground coal operation in QLD. We set about a 2 phased approach focused on operational management and improvement initiatives which was supported by the expertise of the broader Xenco group. We implemented our proven system of work to remove the variability within the operations and put a team in place to focus on specific improvement initiatives outside daily operations.

Through targeted interventions and a workforce overhaul, we significantly improved site performance, driving measurable production growth with an increase in average daily production.

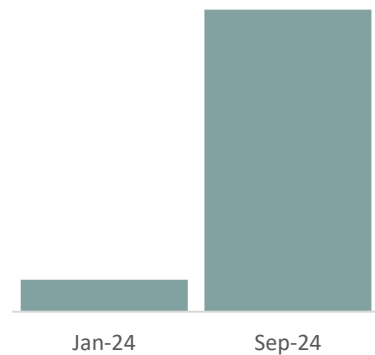

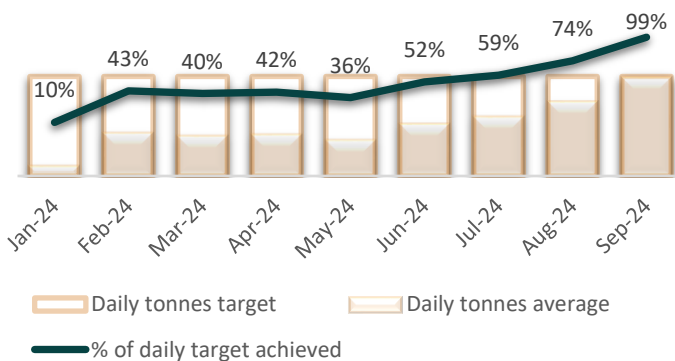

Steps we took:

- Completed a site diagnostic and improvement plan.
- Brought in key Xenco group leaders to implement the improvement plan.
- Implemented a new management operating system across the operations to provide clarity and accountability.
- Upskilled and trained the workforce, utilising SkillStart to fast track new to industry individuals.
- Ensuring accountability and collaboration at all steps of the project.

Key results:

- Increased the average daily production by 9.5x.
- Reduced production volatility.
- Disciplined routines established.
- Built a skilled and competent workforce.

In 8 months, daily average production increased **9.5x**

Transforming underperforming operations into high-performing assets through structured change and focused operational management.

OUR VALUES

SAFETY • INTEGRITY • RIGHT SKILLS • RELIABLE DELIVERY
