

An aerial photograph of a yellow excavator operating in a large, dark, circular pit. The pit's walls are heavily eroded, showing concentric circular patterns. The excavator is positioned in the lower-left quadrant of the frame, facing towards the center of the pit. The ground is dark and textured, with some lighter patches of material.

Core Crew

THE EFFECTIVE AND
EFFICIENT PARTNER FOR
OPERATIONAL SUCCESS

CORE CREW

WHO WE ARE

Our approach is grounded in proven methods, offering managed solutions to the resources and heavy industry to solve complex operational challenges. We have industry experience in fully outsourced operations, or we can run specific parts of the operation and business. Our teams of highly skilled operators are supported by our own operational and executive leaders. These cohesive teams help us to provide flexible and tailored solutions.

When Core Crew commits to delivering outcomes, our commitment is a dedication to ensuring that our clients experience real, measurable benefits from our partnership.

WHAT WE DO

Tailored Solutions

Created to fit your business perfectly

Genuine Partnerships

Committed to your growth and success

Operational Success

Achieving goals with effective strategies

OUR APPROACH

We provide comprehensive support, from full business management to specific operational needs, ensuring a seamless integration across operational teams, support services, logistics, and site functions. This holistic approach fosters a unified strategy, where every element works cohesively to achieve success.

Our expertise encompasses every facet of mining operations and business management, including safety, production optimization, maintenance, site and executive leadership, and the complexities of inbound and outbound logistics. This broad scope enables us to navigate industry challenges with precision and foresight.

Our strength lies in our deep operational understanding and our ability to quickly deliver tailored solutions that drive efficiency and maximise impact.

SERVICES

WHOLE OF MINE

Core Crew can manage the whole of operations to execute the plan and deliver the operational success our partners want. This can encompass all operational personnel; this includes all production, processing, maintenance, in and outbound logistics and other support services. Whether it's project delivery or meeting cyclical operational needs, we possess the knowledge, experience, and skills to deliver the right people at the right time, managing the entire process.

TEAM SOLUTIONS

Core Crew provides more than just a workforce; we offer a cohesive team and a comprehensive solution. Our approach goes beyond resourcing by delivering a complete team equipped to handle any aspect of your operation. This delivery is backed by our group of executive operational leaders. The key to our success is our understanding of the whole picture. We can place a team into manage a particular facet of your operations and to work along side your existing people. We will provide the people, the process and structure to ensure that we manage your problems on your behalf.

SERVICES

MANAGED SERVICES

As a seamless extension of your business, we deliver fully managed services tailored to your unique needs. Our approach includes supervision and operational support for on-site subcontractors, consolidating both technical and commercial management into a single, streamlined point of accountability. We ensure clear and consistent communication, regularly reporting back to keep you informed and in control. This allows you to focus on safe, efficient, and effective business operations while we handle the complexities on your behalf.

OPERATIONAL SUPPORT

We understand that running a mine involves more than just production. Our flexible approach ensures we can support you in non-core areas when needed. We deliver tailored solutions for site infrastructure, rehabilitation, projects, equipment, and technical specialists, ensuring your entire operation is set up for success.

EMPLOYMENT SOLUTIONS

SKILLSTART

The rapidly changing employment landscape, requires new and innovative approaches to provide a workforce solution. To address this, our training partner, Core Crew Training, developed **SkillStart**. This new to industry program helps individuals learn required skills faster than traditional training so they can start work confidently and competently sooner.

PSYCHOMETRIC ASSESSMENTS

Psychometric assessment is a key tool that informs our key hires and supports our SkillStart program. It provides a data based and scientifically back method for measuring the capability of the people within the business. This ensures they have the ability to fill the critical roles that they require. Our experience shows, this investment is best made in the initial phases to ensure you are forming the right team to deliver the results.

KEY BENEFITS OF OUR PROGRAMS

- Enhances recruitment and selection processes
- Increases job satisfaction and reduces candidate turnover
- Accommodates all role types, including operators, trades and staff roles.
- Promotes rapid skill development for job readiness.
- Provides hands-on, real-world training with expert guidance.
- Offers flexible progression tailored to individual capability.
- Boost operational performance and productivity for businesses.

HOW WE HELP BUSINESSES

<p>Enhancing our deployed resources with support from industry experts</p>	<ul style="list-style-type: none">• Our clients can access our specialised skills when required, move quickly to bring in the relevant expertise to match the scope of work, and be content in the knowledge that the interim employee has a strong understanding of their business objectives and is supported by leading industry experts.
<p>Market-competitive pricing & retention of operational knowledge</p>	<ul style="list-style-type: none">• We provide workforce solutions at market competitive rates with access to mining, process, maintenance, supply, and commercial subject matter experts.• Clients repeatedly engage our team members for extended periods which provides consistency and retention of operational knowledge that stays with the organisation.
